

Late Pass Questionnaire

Adapted from An Bui's reflection exercises in ENVS 193DS and Sam Csik's in EDS 240

Completing this assignment in full, to the rubric specifications listed below, will earn you a 24 hour late pass that you may use on a single homework assignment. Late passes may only be used once. While we will keep track of your late passes, it is important that you also keep track of them and only submit an assignment late if you know you have a late pass. Submitting late without a late pass will result in a zero on that assignment.

In this assignment you'll introduce yourself, define your learning goals for this course, and outline a plan for how to meet them. You'll revisit these goals in the next Late Pass Questionnaire, should you decide to complete it, so it's good to be reflective from the start!

Complete the following in order to receive a late pass:

- Respond to each of the following questions on a word document and submit to Gradescope by **Saturday, October 3rd at 11:59 pm.**
- Answer each question in 2 - 4 sentences
- Your responses must demonstrate genuine reflection. Low effort answers will not receive credit

Learning Context

Everyone brings their own unique background and experiences to the course. So I can best understand your specific context, please address the following:

1. Do you have a particular career goal in mind? If so, how does this course apply to your future career, if at all?

2. How confident do you feel in your coding skills in R? In other languages? Why?

3. Is there anything you wish your instructors knew about you, but don't (e.g. responsibilities outside of school)?

Learning Goals

4. What skills or knowledge do you hope to gain from this course? Why?

5. What learning objectives from the course are you most excited about? Why?

6. **Most importantly**, how do you plan to accomplish your learning goals for this course? **Be specific!** Instead of stating "I will complete assignments on time", reflect on what strategies you will employ. For example, creating a learning schedule, structured collaboration with peers, participating in online learning communities, etc.

A bit about you!

7. What do you like to do for fun outside of school?

8. Where do you call home?
